THE NEW PAYMENT LANDSCAPE IS...

■ Everywhere

Your customers can be everywhere in today's world, Europe, Singapore even California. To expand successfully, accelerating the time to market for new stores or expanding to new markets online, your payment partner is integral to success. You need a global provider with local experience that can help you bridge cultures and borders.

■ Anywhere

21st century consumers can be anywhere, in your shops, on the sofa in the garden or on the train and you must meet them where they are to grow. To succeed you must bridge the physical and digital worlds to provide a single view of your business. Everyone talks about digital, but with the majority of growth at physical touch points in many markets focus only on online at your peril

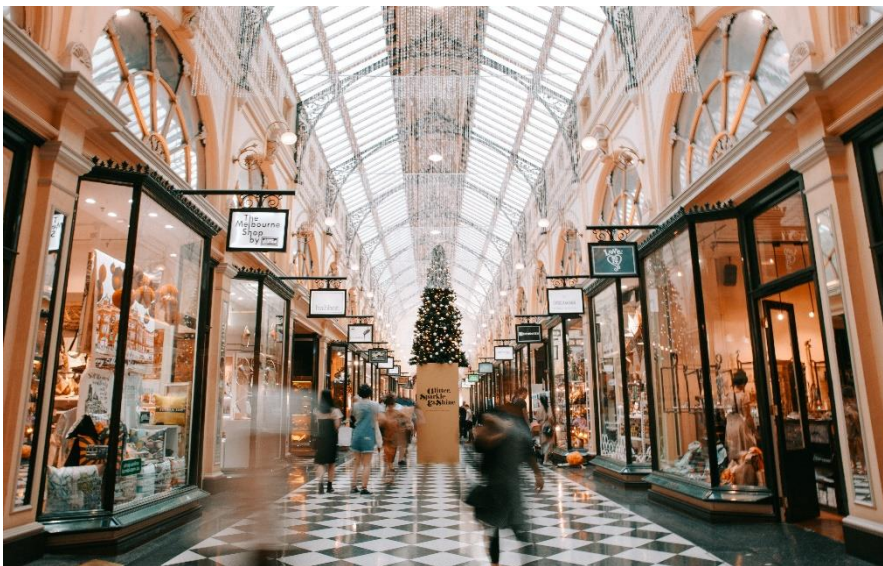

■ Technology First

To succeed you must extend your focus beyond payments. Choosing a "Technology First" partner means bringing together physical and digital worlds into a flexible platform. Payments, Value Added Services, supply chains and the adaption of local infrastructure into a single managed solution across all markets is a must For all merchants and banks today

■ Growth Driven

Driving revenue and customer traffic are the primary objectives for any business. To stay in control you need a partner that make the complex simple. You need a partner you can trust to manage payment complexities across borders, channels, currencies and technologies. Having unified reporting and localisation of payment and value-added services is key to success.

OUR FOCUS

Using
intelligent
payments
technology to
drive growth
across
borders

Technology

We are a “Technology First” business, enabling complex payments to happen quickly, efficiently and reliably across borders, cultures and changing consumer demands.

Intelligence

We help businesses see Global Trends and discover Local Analytics providing the relevant data and tools to help businesses capitalise, grow and expand.

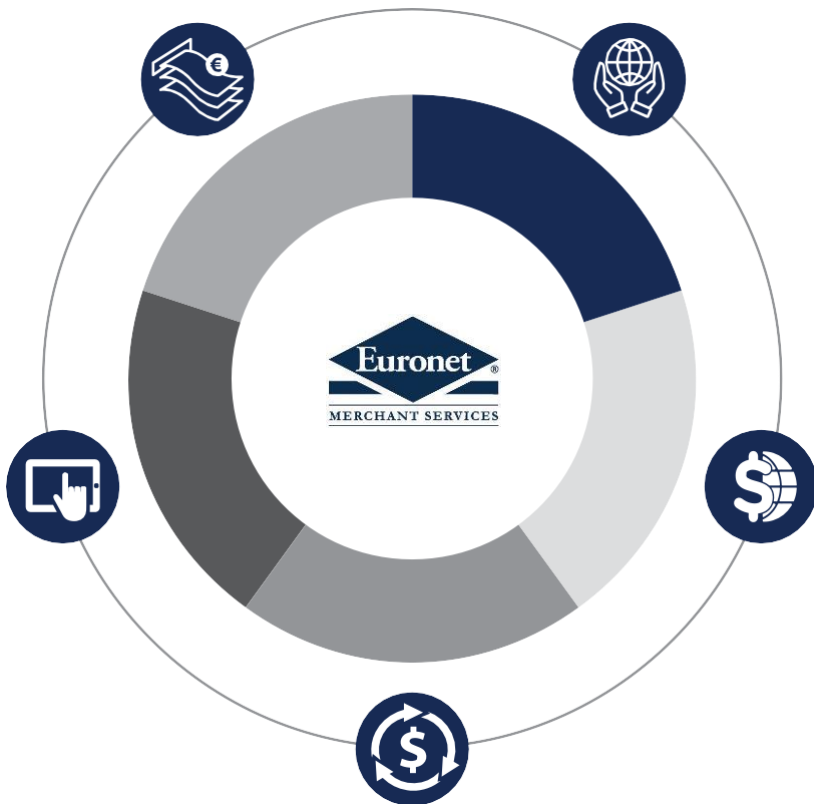

Expertise

Using our global team and local expertise, we help businesses increase footfall, traffic and consumer engagement, drive sales, conversion and revenue.

OUR SERVICES

An array of Services that compliment the payments flow, driving growth and revenue for banks and merchants across the world

Payments

Supply and support of physical devices and digital solutions, including ATM's, POS Terminals, Smart POS, eCommerce and Mobile apps. Gateway support for acquiring, processing, switching and alternative payments
